### Molded gratings

CIV Offshore & Shipping delivers molded gratings, manufactured in an open heated mold system. Continuous E-glass roving's are placed in the mold in alternating layers and completely wetted out with resin. This continuous process produces an integral, one piece construction which provides excellent corrosion resistance as well as bi-directional strength. There are a number of different molds available resulting in an extensive range of panel sizes, thickness and mesh patterns.

In general a range of applications can be found in numerous industries, e.g.:

- chemical plant and metal finishing;
- construction engineering, traffic and transportation
- petrochemical engineering, ocean survey, water engineering
- food and beverage plants
- textile printing, dyeing and electronic industries

Main advantages of our products are:

- ✓ Anti-fire
- ✓ Anti-corrosion and anti-aging
- ✓ Anti-slippery
- ✓ Light but high loaded strength
- ✓ Long service life and maintenance free
- ✓ Non-conduction or magnetic
- ✓ Easy installation and rich colours
- ✓ various sizes and colours available
